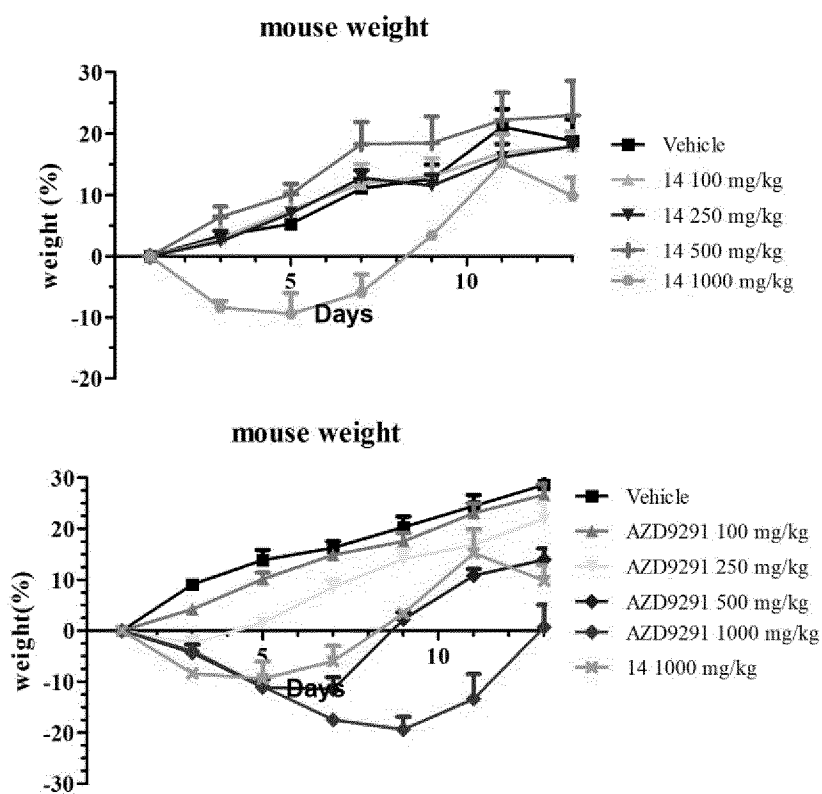

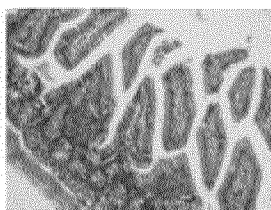

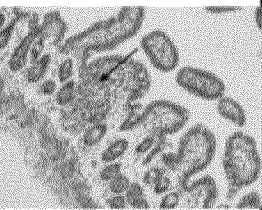

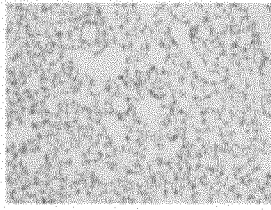

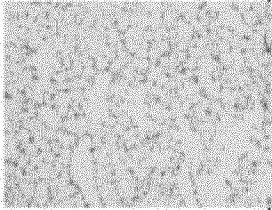

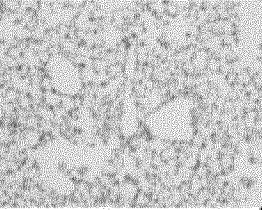

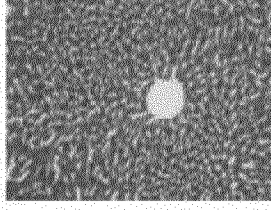

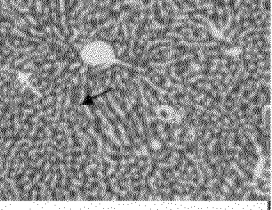

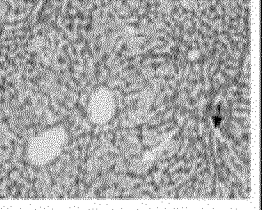

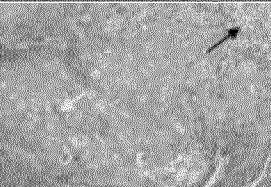

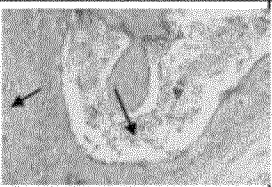

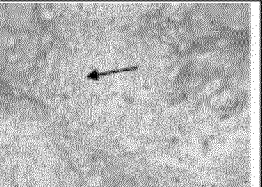

Fig. 4

Tumor-bearing tissue	Control	Compound 14 25mg/kg	AZD9291 25mg/kg
Intestine			
	Normal tissue structure, no pathological change	Mucosal inflammatory cell focal infiltration, as indicated by the black arrow	Inflammatory cell focal infiltration seen in tissue, as indicated by the black arrow
Lung			
	Normal tissue structure	Normal tissue structure, no pathological change	Pulmonary congestion, interstitial edema
Liver			
	Normal tissue structure, no pathological change	Extensive hepatic sinusoids dilatation in the entire tissue, as indicated by the black arrow; visible mild fatty degeneration in liver tissue, with small droplets of lipid, as indicated by the yellow arrow	More severe liver injury, extensive hepatic sinusoids dilatation, as indicated by the black arrow; visible necrosis in liver tissue, as indicated by the yellow arrow
Tumor			
	Some part of nucleus shrinking in the tissue, as indicated by the yellow arrow; a slight necrosis of cells in the entire of tissue, as indicated by the black arrows	Moderate necrosis of cells in the entire tissues, as indicated by the black arrow	Moderate necrosis of cells in the entire tissues, as indicated by the black arrow

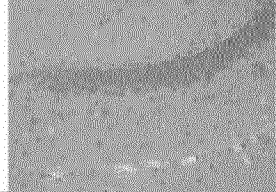

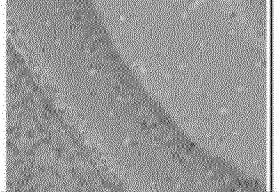

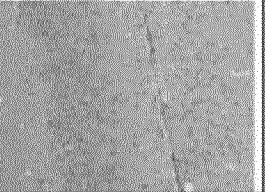

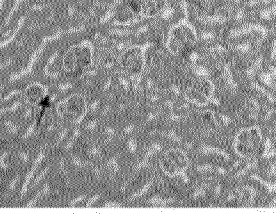

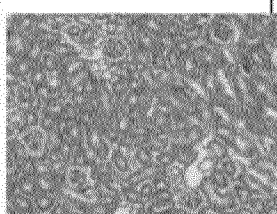

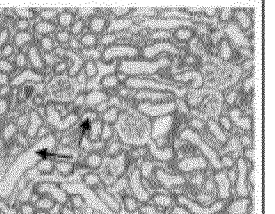

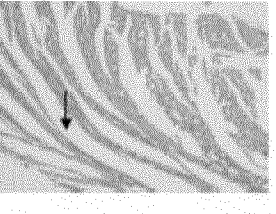

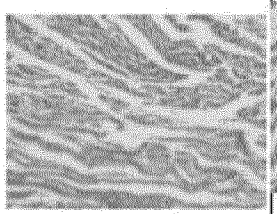

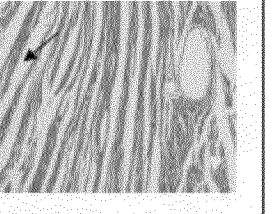

Brain			
	Normal tissue structure, no pathological change	Normal tissue structure, no pathological change	Normal tissue structure, no pathological change
Kidney			
	part of glomerular wall in the tissue thickening, as shown by the black arrow	Part of glomerular wall in the tissue thickening, as shown by the black arrow; no significant abnormality	Extensive kidney tubular lumen expansion in tissue, as shown by the black arrow; part of glomerular wall thickening, as shown by the yellow arrow; visible transparent tube
Heart			
	Moderate expansion of myocardial fiber gap in the tissue, as indicated by the black arrow; vacuoles formed in the cytoplasm of the myocardial fibers, as indicated by the yellow arrows	Moderate expansion of myocardial fiber gap in the tissue	Moderate expansion of myocardial fiber gap in the tissue, as indicated by the black arrow; vacuoles formed in the cytoplasm of the myocardial fibers, as indicated by the yellow arrows
