

CLAIMS

1. A therapeutic agent that inhibits poly [ADP-ribose] polymerase (“anti-PARP therapy”) for use in treating cancer in a human patient, wherein the patient is characterized by previous treatment with a platinum-based therapy and an absence of a germline or a sporadic mutation in BRCA1 and/or BRCA2.
2. The therapeutic agent of claim 1, wherein the patient is further characterized by an absence of homologous recombination deficiency (HRD).
3. The therapeutic agent of claims 1 or 2, wherein the patient has a tumor with a negative HRD status.
4. The therapeutic agent for use according to any one of claims 1-3, wherein the agent is selected from the group consisting of: ABT-767, AZD 2461, BGB-290, BGP 15, CEP 9722, E7016, E7449, fluzoparib, INO1001, JPI 289, MP 124, niraparib, olaparib, ONO2231, rucaparib, SC 101914, talazoparib, veliparib, WW 46, and salts or derivatives thereof.
5. The therapeutic agent for use according to claim 4, wherein the agent is niraparib prepared in the form of a tosylate monohydrate.
6. The therapeutic agent for use according to claims 4-5, wherein the niraparib is administered as a maintenance therapy following complete or partial response to at least one platinum-based therapy
7. The therapeutic agent for use according to any one of claims 1- 6, wherein the cancer is selected from the group consisting of: ovarian cancer, fallopian tube cancer, peritoneal cancer, and breast cancer.

8. The therapeutic agent for use according to any one of claims 1-7, wherein the cancer is a recurrent cancer.
9. The therapeutic agent for use according to any one of claims 4-5, wherein the ovarian cancer, fallopian tube cancer or peritoneal cancer is sensitive at the commencement of treatment.
