

CLAIMS

1. A therapeutic agent that inhibits poly [ADP-ribose] polymerase (“anti-PARP therapy”) for use in treating cancer in a human patient, wherein the agent is niraparib and wherein the patient is characterized by previous treatment with a platinum-based therapy and an absence of a germline or a sporadic mutation in BRCA1 and/or BRCA2.
2. The therapeutic agent for use of claim 1, wherein the patient is further characterized by an absence of homologous recombination deficiency (HRD).
3. The therapeutic agent for use of claims 1 or 2, wherein the patient has a tumor with a negative HRD status.
4. The therapeutic agent for use according to any one of claims 1-3, wherein the niraparib is prepared in the form of a tosylate monohydrate.
5. The therapeutic agent for use according to any one of claims 1-4, wherein the niraparib is administered as a maintenance therapy following complete or partial response to at least one platinum-based therapy
6. The therapeutic agent for use according to any one of claims 1- 5, wherein the cancer is selected from the group consisting of: ovarian cancer, fallopian tube cancer, peritoneal cancer, and breast cancer.
7. The therapeutic agent for use according to any one of claims 1-6, wherein the cancer is a recurrent cancer.
8. The therapeutic agent for use according to claim 6, wherein the ovarian cancer, fallopian tube cancer or peritoneal cancer is platinum sensitive at the commencement of treatment.
